👤 ABOUT

I am an IT graduate with a background in computer programming, networking, data-base systems, and cyber-security fundamentals. Technologically inclined and has experience in Full Stack Development and mobile development but still learning about the different options available in the field. Has problem-solving abilities, a keen desire for new technology, and a willingness to learn more.

📁 WORK EXPERIENCE

Work Immersion, *CREOTEC Philippines Inc.*

2019 | Manila

- Created a team plan to meet daily quotas, and coordinated with the team leader to foster a **productive team environment**.
- Participated in Quality Assurance production.
- Analyzed the quality of the chips, **implemented improvements**, and completed daily quotas.

Internship, *Globe International Distributor Center, Inc.*

2025 | Quezon City

- Enables warehouse personnel to **view, update, and manage inventory counts**, starting from a physical paper-based system to a digital mobile format.
- Programmed a large-scale **inventory encoding** while designing a responsive, modern UI to ensure the application remained **user-friendly** for warehouse personnel.
- Implemented advanced functionalities including a **dark mode UI, permission-based storage access, and an automated Excel (.xlsx) export system** using Share Plus for seamless inventory data sharing.
- Includes a list of **orders for inventory** that can be edited and filtered by batch to streamline the selection process of users.
